TEN CENTS PER WEEK

## WOMANHOOD LEADS IN ADVANCEMENT AND ALWAYS WILL

History of Her Rise From Sub-servience to Superiority to Man.

Guy Carleton Lee's Lecture This Afternoon.

ON "VICTORIOUS WOMANHOOD"

### THE LECTURES.

- Tonight at 8:30 — "When the People Wake."
- Tomorrow at 2:30 — "Jefferson Davis."
- Tomorrow night at 8:30 — "The Nation Triumphant."

"Victorious Womanhood" was the subject of Dr. Guy Carleton Lee's second lecture this afternoon at the Kentucky Avenue Presbyterian church. With characteristic art, brilliancy of diction and command of his subject, Dr. Lee began: "The subject of woman is as man-sided as a diamond, and if we are adequately to consider any one phrase of it we must choose between the sides. This selection is by no means easy; but since it must be made, we will choose woman's influence in the world's advance, and show, not only why she was the predominating influence of yesterday, but why she is today and always will be."

Dr. Lee first considered woman in the prehistoric ages, and said: "We may summarize the position of woman in her first stage of progress, by saying that she—sane in isolated cases—was through the prehistoric world, a chaste, a toy, an animal, owned body and soul, by man, and the first step in woman's upward progress came only when love asserted its independence—it's right to be. And it was through the Hebrew that it came—the first evangel of the human heart."

**Women in the East.**  
The condition of women in the east (India, Assyria, Babylonia and Arabia) were considered; then the women of Greece and Rome were discussed, and the contributions made by them to the history of their sex were set forth with clearness and precision.

The next part of the lecture was occupied with the influence of the Germanic woman upon history, and the lecturer said: "The Germanic woman, for the first time, gave to the world the idea of woman's physical and moral equality with man. She made herself man's companion in the truest sense of the word. She became man's helpmate as well as the mother of his children. She gave man a home, not a harem. These things did the good women of the Teutonic lands, the mothers of the race that first settled this country."

**The Modern Woman.**  
After a summary of the contributions made by the women of the ancient world to the progress of their sex, the lecturer swept through the history of the middle ages and came to modern times. He said: "With the advent of modern times came the full opportunity of women. To understand the use she has made of that opportunity we will make an analysis of woman's nature and of her position in the world today."

Next came the discussion of woman's position in the world of today: "The American woman, more than her sisters of any other nation, has come into her heritage of freedom. The nineteenth century saw the delivery of the negro. The twentieth century shall witness the complete emancipation of woman." But," continued the orator, "great are woman's achievement in the world of business. In it she has conclusively demonstrated her equality with man. But is it through public life that woman's highest ideal is to be won?"

The lecturer pointed out the tremendous results of woman's work in reform, but asked the question, "Is woman's highest mission that of the reformatory or of the hustings?" and concluded his argument by saying: "Admitting then the adaptability and power of woman in business life and in the work of reform, we still assert that for the great mass of women destiny does not lie in the marts of trade, nor upon the platform. The mission of the average woman is to be a home-maker, as certainly as it is the mission of the average man to be the eternal spirit of woman's righteousness, the spirit of the woman of the home. Knowing this we may well say that through woman we shall come to realize the secret of abiding happiness, the key to the future of our race, for the heart-words of life that it has benefited home life. Grant-

## First Visit of British Monarch to Capital of Germany in 200 Years Is Celebrated in Grand Fashion

Kaiser and King Exchange Kisses and Ride in Royal State to Palace.

Berlin, Feb. 9.—The king and queen of England made a triumphal entry into Berlin. It was the first state visit of a British monarch here in nearly two centuries. The kaiser was dressed in British uniform and welcomed Edward, who was in German uniform when he stepped from the train. A great crowd of dignitaries were at the station. The kaiser kissed Edward. They went in the royal state coach to the palace. On the way they were formally greeted by the mayor and aldermen. Edward briefly replied to an address of welcome. At the palace a salute of 101 guns was fired. The state banquet will be tonight at the palace.

**France and Germany.**  
Paris, France, Feb. 9.—Germany today signed a new Moroccan agreement. France promises not to interfere in Germany's economical program in Morocco.

**Carrie Discouraged.**  
London, Feb. 9.—Carrie Nation is discouraged in her crusade against drinking and smoking in England. Today she booked passage for America. She will sail March 1. The services conducted by the Rev. G. W. Banks, pastor of the Fountain Avenue Methodist church. The burial was at Oak Grove cemetery.

**Five Millions Divorce.**  
Chicago, Feb. 9.—Mrs. Ruth May Evers, worth five millions, daughter of the late Gustavus Swift, was granted a divorce from her husband, Ernest Evers, at a quiet hearing today. The ground was deserted.

**Loose Leaf Sales.**  
Sales at Bohmer's loose leaf warehouse this morning amounted to \$8,000 pounds, which is next to the highest record for one day's sales. The prices were \$4.10 to \$8.65 a hundred pounds. Most all the local buyers were present and several buyers from Louisville and Cincinnati. There were no rejections at the sale this morning.

**ing to women the privilege of earning their own living has resulted in more homes and happier ones. But while I rejoice in the strength and freedom that has given the power to support themselves to women, yet I earnestly contend that it is ill advised for a married woman to accept a business position, provided her husband can support her, even if ever so plainly." The lecturer took this position because he stands out against anything that tends to the injury of the family—that tends to destroy the sweet home of life.**

He said: "Today it behoves every good woman and every good man to be on guard, for the American home is in danger." And he electrified his audience by the assertion that the danger most to be feared at this present hour was almost unknown to the good women of the land. With a force, clearness, and absolute fearlessness of speech, he piled fact on fact and argument on argument, until his conclusion, in which he said: "But I say to you—and I know that I speak for every clean and virile man, for every thinking man and woman, for every true student of history—I say, beware of those who decree marriage; for, even though they may not realize it, they are endangering the virtue of our women, the morality of the state, the integrity of the nation. Beware of those who sneer at the love of man—for they are attacking the greatest human power for righteousness. Shun those who would teach women a false idea of wifehood and motherhood, for these false prophets while pretending to strike shackles from woman, are dealing her the blows of a poisoned weapon, whose virulence, eating its way like a loathsome cancer, into the heart of womanhood, shall in the end destroy the very foundation of the mighty structure of civilization."

The lecturer then proceeded to show not only the fallacy, but the wickedness of those who are attacking the American home and the American family. He demolished the position of those theorists who are attempting to tear down the position, which woman has won for herself, and he concluded his masterpiece of logic, illustration and beautiful thought, by saying: "Man today knows that undercurrent for good has that ever flowed calm and strong beneath all the fret and evil of the tempest tossed sea of human life, is the eternal spirit of woman's righteousness, the spirit of the woman of the home. Knowing this we may well say that through woman we shall come to realize the secret of abiding happiness, the key to the future of our race, for the heart-words of life that it has benefited home life. Grant-

**MRS. JULIA JACKSON**

DIES AT HER HOME OF URAEMIC POISONING.

Wife of L. F. Jackson, 1202 Trimble Street—She Was Devoted Mother.

Mrs. Julia Jackson, 43 years old, died yesterday afternoon at 2:30 o'clock at her home, 1202 Trimble street, after a long illness. The immediate cause of her death was uraemic poison. She had been ill since last August and since October had briefly replied to an address of welcome. At the palace a salute of 101 guns was fired. The state banquet will be tonight at the palace.

**Mr. Jackson.**  
Mrs. Jackson was the wife of Mr. L. F. Jackson. She was born and reared in Georgia and had lived in this city for the last three years. Besides her husband, she is survived by four children, Misses Sarah Louise, Camille and Martha Jackson and Mr. Fort Jackson.

**Mr. Jackson.**  
Mrs. Jackson was a devoted member of the Fountain Avenue Methodist church and was a woman of a kind, generous and motherly disposition, and had a large number of friends in this city. The funeral was held this afternoon at 2 o'clock at the residence. The services were conducted by the Rev. G. W. Banks, pastor of the Fountain Avenue Methodist church. The burial was at Oak Grove cemetery.

**Dr. G. W. Williams.**  
Dr. G. W. Williams is seriously ill at the home of his daughter, Mrs. J. T. Rice, 226 North Eighth street. He is suffering from partial paralysis and a complication of diseases incident to advanced age. His son, Mr. H. C. Williams, of Urbana, O., has arrived to attend his bedside.

**Ishkoodah Meeting.**  
A meeting of the staff of the Ishkoodah, the High school paper, was called this morning, and it was decided to give a play after the oratorical contest. The proceeds from the play will be utilized in issuing a creditable annual a. the end of the present semester. It is intended to have halftones of the graduates, as well as all classes and teams.

**WEST KENTUCKY COAL CO. OFFICIALS IN THE WRECK.**

Mr. C. M. Rucker, manager of the Paducah office of the West Kentucky Coal company; Mr. C. S. Bookwalter, manager of the transportation, and Mr. J. C. Bryden, vice-president of the company, of New York, were in the wreck at Coldwater, Miss., when fast passenger train No. 102 ran into a high open switch. The Paducah party was in a rear sleeper and besides being jolted, did not receive any injuries. They returned to Paducah last night.

**Illinois Deadlock**

Springfield, Ill., Feb. 9.—John Mitchell, former head of the Mine Workers, received one vote for senator today on the twenty-eighth and only ballot taken by the legislature. Hopkins had 73.

**CASHIER AT SMITHLAND IS LEAVING FOR TEXAS.**

Mr. S. P. Berry, cashier of the First National bank at Smithland, has resigned his position and is preparing to remove to Ft. Worth, Tex., where he accepted a position as cashier in a bank. Mr. Berry has been a leading citizen of Smithland, and his departure will be heard with regret, as he was also known in Paducah. He will succeed in the bank as cashier by Mr. F. M. Bush, assistant cashier, who in turn will be succeeded by Mr. Marvin Scyter.

**DESPERATE WIDOW SHOOTS MAN AND SWallows POISON**

New York, Feb. 9.—Mrs. Martha Erickson today, after waiting five hours in the cold with a revolver in her muff, shot William Schwanemann, a grocer, whom she said refused to marry her. Officers chased her several blocks and captured her. She was taken to the police station and took a dose of strichine which was hidden in her stocking. She was greeted by the town tonight to take to the same hospital with her which he will return. The mayor, in official robes, will deliver an address to which Binns will reply.

## COMMITTEE NAMED BY FISCAL COURT TO GO OVER BOOKS

County Judge, Attorney and Magistrate Will Make Settlement.

**State Revenue Agent is Barred From It.**

OFFICE OF COUNTY CLERK

To make a settlement with the Title Guaranty and Surety company of Scranton Penn., bondsmen for Hiram Smedley, who has resigned as county court clerk, a committee was appointed this morning by the fiscal court. The committee appointed consisted of County Judge R. T. Lightfoot, County Attorney Alben Barkley and Magistrate George W. Broadfoot.

In the suit filed by Revenue Agent W. M. Husbands it is alleged that a shortage of several thousand dollars exists in the office, but the exact amount has never been determined.

The committee will begin work at once to go over the books of Mr. Smedley, and if a shortage is found a settlement will be made with the bonding company. Mr. Elie G. Boone, an agent of the company, is now in charge of the office.

The settlement was taken out of the hands of Mr. Husbands, state revenue agent, who filed the suit for the settlement by the fiscal court. By the plan of having Mr. Boone hold the office it is hoped to make the fees of the office pay any shortage that may exist in the office, less any fees. The term of Mr. Smedley will expire next January.

**G. W. Sampson Dies.**

Lyon, N. Y., Feb. 9.—George M. Sampson, brother of the late admiral and father of Harry Sampson, for whose alleged murder his widow was indicted yesterday, was found dead in bed at his home at Palmyra today.

**Injured in Wreck.**

Memphis, Tenn., Feb. 9.—Among others injured in the wreck at Coldwater on the Illinois Central were J. T. Talbert, vice president of the Commercial National bank of Chicago, who was slightly bruised; and E. W. Washburn, instructor in chemistry University of Illinois, Urbana, Ill., whose neck was sprained.

**MORE JAP BAITING.**

**Bill Introduced in Nebraska Segregating Mongolian Laborers.**

Lincoln, Neb., Feb. 9.—Representative Jerry Howard, of Douglas county, today introduced in the house a bill to segregate Japanese and Chinese laborers from America workers. The measure provides that the Japanese must not work in company with white men and must not be employed in the same building. Howard says his bill was evolved to eradicate conditions existing in South Omaha, where Japanese laborers are employed in the packing houses.

**DR. OVERTON BROOKS IS**

**DR. OVERTON BROOKS IS**

Dr. Overton Brooks, son of Dr. and Mrs. John G. Brooks, will arrive in this city tomorrow after spending five months in Europe, traveling and studying his profession. Dr. Brooks arrived in New York city last Sunday morning and will come here from Chicago, his home. He has visited in England, Germany, France, Spain, Italy and Austria Hungary. Dr. Brooks met the fleet of battleships at Gibraltar before coming home.

**WEATHER.**

**Charles Weatherford Alone Survives Bloody Affray at Alexandria.**

Alexandria, La., Feb. 9.—News reached here of the death of Robert Weatherford at Hinton, La., last night. Weatherford was shot Saturday in an affray wherein he and his brother, Charles Weatherford, opposed Henry and Bud Barrington, father and son, both of whom were killed.

The coroner's jury returned a verdict that the Barringtons came to their death as a result of gunshot wounds received at the hands of Charles Weatherford, who is now in jail in this city.

**Honor "Jack" Binns**

Petersborough, Eng., Feb. 9.—"Jack" Binns, Republic operator, will take a dose of strichine which was hidden in her stocking. She was taken to the police station and to the same hospital with her which he will return. The mayor, in official robes, will deliver an address to which Binns will reply.

## All But One Member of Committee In Lower House of Congress Vote to Pass Census Bill Over the Veto

President Roosevelt Sends Message and Report of Country Life Commission to Congress.

Washington, Feb. 9.—At a meeting of the house committee on the census all except one of the 16 members favored the passage of the bill over the president's veto. Action was deferred until Thursday.

**Abolish Canal Commission.**

A bill considered in the house today proposes the abolition of the Panama canal commission and putting the work directly under the charge of the president.

**Wireless Bill.**

Washington, Feb. 9.—The bill requiring wireless apparatus on all ocean going passenger steamers was recommended to the house for passage today.

**Country Life Message.**

Washington, Feb. 9.—(Special.) President Roosevelt today sent to congress his message, conveying the report of the commission on country life. In his message.

**Among other things he says:**

"From all that has been done and learned three great general and immediate needs of country life stand out:

"First, effective co-operation among farmers, to put them on a level with the organized interests with which they do business.

"Second, a new kind of schools in the country, which shall teach the children as much outdoors as indoors and perhaps more, so that they will prepare for country life, and not as at present, mainly for life in town.

"Third, better means of communication, including good roads and a parcels post, which the country people are everywhere, and rightly, unanimous in demanding."

"To these may well be added better sanitation; for easily preventable diseases hold several million country people in the slavery of continuous ill health.

"The commission points out, and I concur in the conclusion, that the most important help that the government, whether national or state, can give is to show the people how to go about these tasks of organization, education and communication with the best and quickest results. This can be done by the collection and spread of information. One community can thus be informed of what other communities have done, and one country of what other countries have done. Such help by the people's government would lead to a comprehensive plan of organization, education, and communication, and make the farming country better to live in, for intellectual and social

"pool tables to an establishment, which is only one-half the amount charged at present and which the operators say is high enough to make the business unprofitable.

"When the proposed reduction became known a storm of protest was raised and at the churches Sunday the ministers had a great deal to say about pool rooms. At the close of services petitions were eagerly signed, calling on the council to make the pool room license \$600 per year, or at such a figure that would be absolutely prohibitory.

"The council will meet again in two weeks and things are expected to happen when the matter comes up for consideration.

**It all came up about the action of the city council ordering an ordinance which fixed the license for pool rooms at \$100 for three**

**WEATHER.**

**WEATHER.**

**Graves Case Reversed.**

Frankfort, Ky., Feb. 9. (Special.) Continental Insurance company vs. Hargrove, from Graves county, reversed by the appellate court.

**Tobacco Meeting.**

Hopkinsville, Ky., Feb. 9. (Special.) A meeting is called for Hopkinsville Saturday of tobacco growers of the Black Patch to insist on an open market and loose sales of pooled tobacco.

**Fish Trust Ends.**

Chicago, Feb. 9.—Plans today will be completed for the dissolution of Booth & company, the fish trust.

"Jack" Binns, Republic operator, will be greeted by the town tonight to take to the same hospital with her which he will return. The mayor, in official robes, will deliver an address to which Binns will reply.

# S.S.S. HEALS OLD SORES

Before any sore can heal, the cause which produces it must be removed. As long as the blood, from which our systems receive their necessary nourishment and strength, remains impure and contaminated with disease germs, any old sore on the body will remain open, and resist every effort made to heal it. The nerves and tissues of the flesh around the places are continually fed with unhealthy matter and nature is simply disposing of the poison by draining it from the system through the sore. The only cure for an old sore is a thorough cleansing of the blood, entirely ridding the system of the cause. S. S. S. heals old sores by removing every particle of impurity from the circulation. It goes down to the very bottom of the trouble and so completely cleanses the circulation that there is no longer any impurity to drain through the sore, but the place is once more nourished with rich, healthful blood. S. S. S. heals the sore from the bottom, the place soon fills in with healthy, firm flesh, the tenderness leaves, all discharge ceases, the skin regains its natural color and when S. S. S. has thoroughly cleansed and purified the blood the place is permanently healed. Book on Sores and Ulcers and any medical advice free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

## FARMERS OF STATE

WILL HEAR EXPERTS ON AGRICULTURAL SUBJECT.

Chairman Rankin and Secretary Shy Have Been Working on the Program.

Chairman M. C. Rankin, of the state board of agriculture, forestry and immigration, under whose auspices the state farmers institutes are held, today announced the program for the fourth annual institute, which is to be held this year at Elizabethtown, Hardin County, Wednesday, Thursday and Friday, February 24, 25 and 26. Secretary Perry M. Shy, of the board, has been devoting almost his entire attention to the arrangement of the program, for the past week, and it is believed that one of the most attractive and finished programs ever prepared for the farmers' gatherings will be presented at the session.

Among the farm experts who will speak to the Kentucky farmers, and their subjects will be:

A. D. Shuml, of the United States department of agriculture at Washington, who will discuss "Why and How to Increase Kentucky's Corn Crop."

Lowell Roundbush, New Richmond, Ohio, "Wheat and Oats Cultivation."

Fred H. Rankin, superintendent agriculture extension, Urbana, Ill. "Developing the Farm Boy for Useful

Activity."

The two women on the program are Miss Bertha Miller, of Franklin, Ind., who will discuss "Domestic Science and Why It Should Be Practiced in Your Home," and Mrs. Letcher Riker, of Harrodsburg, who will tell "What the Women's Federation of Clubs Can Do to Advance Agricultural Interests of Kentucky."

The address of welcome at the opening of the institute will be made by Editor H. A. Sommers, of the Elizabethtown News, and response will be made by President H. M. Foreman, of the institute.

### PILE! PILE! PILES!

Williams' Indian Pile Ointment will cure Blind, Bleeding and Itching Piles. It absorbs the tumors, relieves itching at once, acts as a poultice, gives instant relief. Williams' Indian Pile Ointment is prepared for Piles and Itching of the private parts. Sold by druggists, mail 50¢ and \$1.00. Williams' Mfg. Co., Proprietary, Cleveland, O.

"Hubby, I'm going in for the simple life."

"Does that call for anything new in the way of gowns?"—Louisville Courier-Journal.

### PILES CURED IN 6 TO 14 DAYS.

PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 4 days or money refunded. 50¢.

About once a year the Queen of Siam wears a state robe which is regarded as the most magnificent in the world.

In Northern Norway the longest day lasts from May 21 to July 22.

### YOU WILL BE PROUD

of our turnouts. We can furnish you at any time swell turnouts with single horse or team, at most reasonable terms. Our horses receive the best care, and our carriages are of the latest and best styles. Private teams are boarded by the week at low rates.

## WHEAT PRICES FORCED HIGHER

### Special Support Necessary to Maintain Values.

No Evidence of Scarcity and Other Countries Supplying Europe in Grain Market.

### PAR ABOVE WORLD'S BASIS.

Chicago, Feb. 9.—Evidences of a disposition on the part of large owners of wheat to force values to a higher level have been numerous throughout the last week. Prices were at no time in the week lower than on Monday last and it has been the evident plan to keep the strain on the May shorts as steadily as possible. Enough heaviness in the general situation developed toward the end of the week, however, to necessitate active support as it was found that the bulge was bringing in more selling than buying orders. This, along with the ordinary week-end and other realizing, made quite a pressure on the market.

No evidence of a broadening trade have accompanied the last week's advance in values, which was largest in the May delivery, where the big holdings are concentrated. On the other hand there has been distinctive evidence of an increase in the movement from the interior, the effect on the flour trade has been dampening and outside markets have shown a tendency to drop away from the Chicago basis.

The one feature that has been kept prominently in the foreground is the big premiums over regular contract delivery grades that are being paid. In all directions for red winter wheat. These premiums have not prevented a fair cash trade, but the total sales have not been large enough to stand out prominently over those of similar weeks at this season in other years, and they can hardly be called a true index of the cash wheat market. Hard winter wheat thus far has been ruling at about a full carrying charge difference below May delivery here, and it is gradually getting to a basis which will enable its being brought here at a profit from western and southwestern points.

**Flour Trade Improves Slowly.**  
Improvement in the flour trade during the last week has been slight. In fact, many prominent factors in that trade have questioned if there has been any improvement, taking the trade as a whole. Larger northwestern mills appear to be in about the same position as the smaller mills of the spring wheat section, and have received no material stimulation to their business, because of the fact that increasing prices for red winter have put the spring wheat mills on a much better, relative trade basis than they have enjoyed in years.

In the flour trade, as in many other branches, the disposition of the buyer either from necessity or choice, has been to work on a hand-to-mouth basis at the current level of values. Many mills, however, as well as a number of larger handlers of cash grain, are carrying their stocks outright, making no hedging sales here, and are acting reasonably confident that current values are justified by conditions.

While many who are usually conservative and well-seasoned in the trade hold strong views on wheat, others see how the rapidly diminishing export clearances will ultimately make a heavy situation in that reserves will thus be gradually conserving beyond the normal rate. Primary receipts during the last week have shown a material gain. The total fell about 400,000 bushels behind that of the corresponding week last year.

**Export Clearances Are Small.**  
Export clearances for the last week were 2,700,000 bushels less than those of a year ago and in the last two weeks have been easily 4,000,000 bushels behind last year's showing for the similar period. In the foreign

### LIFE OF A PIMPLE.

Complexions Are Cleared and Pimples Disappear Overnight Without Trouble.

The dispensers of posilam, a new skin discovery, ask that notice be given that no one is urged to purchase it without first obtaining an experimental package. Those who have tried it will find that the five-cent box, on sale at Gilbert's and all drug stores, is sufficient to cure the worst cases of eczema, where the surface affected is not too large. The itching ceases on the first application. It will also cure acne, tetter, blisters, scaly scalp, hives, bather's and every other form of itch, including itching feet. Being flesh-colored and containing no grease the presence of posilam on exposed surfaces, such as the face and hands, is not perceptible. Water and soap cannot be used in connection with it, as these irritate and prolong skin troubles, sometimes even causing them.

As to the experimental package of posilam it can be had free of charge by mail of the Emergency Laboratories, 32 West Twenty-fifth street, New York. It alone is sufficient to clear the complexion overnight, and to rid the face of pimples in twenty-four hours.

## MANY CASES OF RHEUMATISM HERE

### Tells People How to Get Relief at Small Cost.

Leading Members in South Christian Revolt and Demand Loose Leaf Sale.

Hopkinsville, Ky., Feb. 9.—Thoroughly dissatisfied with the present business system of the Planters' Protective Association and determined that an immediate change must be made if they remain in the organization, about seventy-five of the leading farmers of south Christian, including many of the wealthiest and most prominent citizens and largest land owners, met Saturday afternoon at the Longview school house and adopted measures looking to the betterment of conditions in the tobacco trade. The movement has been fermenting for some time, many members of the association being discontented with slow sales and the way affairs have been conducted by the officials, generally. The last straw was the recent reduction of the schedule of prices by which the 1907 tobacco on the Hopkinsville market was closed out.

At the Longview meeting R. L. Nichols, association committee man, presided. Nearly every person present voiced his dissatisfaction, and a resolution was passed demanding that General Manager Ewing permit the 1908 crop to be sold loose through the association and that arrangements for prompt sales be made. It was set forth that Mr. Ewing had permitted others to sell in this manner and that the Lyon and Caldwell deals, together with the large sales on the loose floors, would tend to tie up tobacco indefinitely, if the slow process of pricing and the ordinary channels of association sales were enforced.

The farmers made it plain that if this request was not granted they would withdraw from the organization.

DeWitt's Little Early Risers, gentle, easy, pleasant, little liver pills. Sold by all druggists.

field the showing is also growing heavier. Supplies on ocean passage, if Saturday's estimates are made good in today's official reports, have increased nearly 13,000,000 bushels in the last fortnight, against an increase of less than half that a year ago. European and afloat stocks are thus being brought up to last year's basis, while the increase in domestic supplies is at the same time not being correspondingly wiped out.

European and afloat stocks are now about 14,000,000 bushels less than last year, while American are about 6,000,000 bushels more in the United States alone and about 21,000,000 bushels more if Canada is included. Foreign markets have shown no noteworthy disposition to become excited over prospective supplies. Nevertheless, values have hardened somewhat abroad. Liverpool values have advanced equal to 2% @ 2 1/2c per bu. and at the close of business Saturday March wheat was equal to 1.13%. It will thus be seen that May wheat at Liverpool was but 1 1/2c higher than at Chicago. Antwerp advanced equal to 2c last week and closed at equal to 1.14 1/2c per bu. May wheat in Chicago gained 2 1/2c last week, July gained 1 1/4 @ 1 1/2c, September gained 1/2c and December 1/4c.

**Weather Checks Corn Marketing.**  
Corn receipts here and elsewhere, were somewhat checked last week as the result of the rough weather of the week before. Roads have been bad and the weather generally too mild for best handling through the entire week, but nevertheless there has latterly been considerable increase in offerings from the interior.

A part of the Nebraska corn has been offered here, although the bulk has, as previously, been going in other directions, including by way of the gulf, for export. Corn handlers who supply the eastern trade estimate the consumption in that important section at not above 60 per cent of the normal of other years, due partly to high prices and partly to necessary retrenchment.

It has been fortunate from a price standpoint that marketing of corn at western centers have been light, otherwise accumulations would undoubtedly have resulted. At current prices for hogs the farmer can continue feeding at a good profit, but in the present state of the provision distributing trade the current rate of consumption is by no means certain that such a situation will long continue. The effect is likely to be a piling up of reserves on the farm if there is not soon some concession to the needs of the consumers of this surplus. Prices last week gained 1/2 @ 1c, a feature being the relatively better advance in May than in deferred months.

**Trade in Oats Slow.**

Trade in oats has been slow in all branches during the last week. Shipping sales are of small quantities and plainly indicate the effect of grudging purchases by consumers. The movement of oats from the interior is light local stocks are small and prices are at a point when every cent of the import duty is required to keep foreign oats out. Even with this duty of 15c, however, Argentine oats have been bought to the extent of about 600,000 bushels in the last ten days for use principally in the eastern seaports and immediately adjacent.

Prices of oats closed practically unchanged from those current a week before. Trade in oats slow.

The dispensers of posilam, a new skin discovery, ask that notice be given that no one is urged to purchase it without first obtaining an experimental package. Those who have tried it will find that the five-cent box, on sale at Gilbert's and all drug stores, is sufficient to cure the worst cases of eczema, where the surface affected is not too large. The itching ceases on the first application. It will also cure acne, tetter, blisters, scaly scalp, hives, bather's and every other form of itch, including itching feet. Being flesh-colored and containing no grease the presence of posilam on exposed surfaces, such as the face and hands, is not perceptible. Water and soap cannot be used in connection with it, as these irritate and prolong skin troubles, sometimes even causing them.

As to the experimental package of posilam it can be had free of charge by mail of the Emergency Laboratories, 32 West Twenty-fifth street, New York. It alone is sufficient to clear the complexion overnight, and to rid the face of pimples in twenty-four hours.

## WANT CHANGE

IN SYSTEM OF PLANTERS' PROTECTIVE ASSOCIATION.

Leading Members in South Christian Revolt and Demand Loose Leaf Sale.

Hopkinsville, Ky., Feb. 9.—Thoroughly dissatisfied with the present business system of the Planters' Protective Association and determined that an immediate change must be made if they remain in the organization, about seventy-five of the leading farmers of south Christian, including many of the wealthiest and most prominent citizens and largest land owners, met Saturday afternoon at the Longview school house and adopted measures looking to the betterment of conditions in the tobacco trade. The movement has been fermenting for some time, many members of the association being discontented with slow sales and the way affairs have been conducted by the officials, generally. The last straw was the recent reduction of the schedule of prices by which the 1907 tobacco on the Hopkinsville market was closed out.

At the Longview meeting R. L. Nichols, association committee man, presided. Nearly every person present voiced his dissatisfaction, and a resolution was passed demanding that General Manager Ewing permit the 1908 crop to be sold loose through the association and that arrangements for prompt sales be made. It was set forth that Mr. Ewing had permitted others to sell in this manner and that the Lyon and Caldwell deals, together with the large sales on the loose floors, would tend to tie up tobacco indefinitely, if the slow process of pricing and the ordinary channels of association sales were enforced.

The farmers made it plain that if this request was not granted they would withdraw from the organization.

DeWitt's Little Early Risers, gentle, easy, pleasant, little liver pills. Sold by all druggists.

field the showing is also growing heavier. Supplies on ocean passage, if Saturday's estimates are made good in today's official reports, have increased nearly 13,000,000 bushels in the last fortnight, against an increase of less than half that a year ago. European and afloat stocks are thus being brought up to last year's basis, while the increase in domestic supplies is at the same time not being correspondingly wiped out.

Foreign markets have shown no noteworthy disposition to become excited over prospective supplies. Nevertheless, values have hardened somewhat abroad. Liverpool values have advanced equal to 2% @ 2 1/2c per bu. and at the close of business Saturday March wheat was equal to 1.13%. It will thus be seen that May wheat at Liverpool was but 1 1/2c higher than at Chicago. Antwerp advanced equal to 2c last week and closed at equal to 1.14 1/2c per bu. May wheat in Chicago gained 2 1/2c last week, July gained 1 1/4 @ 1 1/2c, September gained 1/2c and December 1/4c.

**Weather Checks Corn Marketing.**  
Corn receipts here and elsewhere, were somewhat checked last week as the result of the rough weather of the week before. Roads have been bad and the weather generally too mild for best handling through the entire week, but nevertheless there has latterly been considerable increase in offerings from the interior.

A part of the Nebraska corn has been offered here, although the bulk has, as previously, been going in other directions, including by way of the gulf, for export. Corn handlers who supply the eastern trade estimate the consumption in that important section at not above 60 per cent of the normal of other years, due partly to high prices and partly to necessary retrenchment.

It has been fortunate from a price standpoint that marketing of corn at western centers have been light, otherwise accumulations would undoubtedly have resulted. At current prices for hogs the farmer can continue feeding at a good profit, but in the present state of the provision distributing trade the current rate of consumption is by no means certain that such a situation will long continue. The effect is likely to be a piling up of reserves on the farm if there is not soon some concession to the needs of the consumers of this surplus. Prices last week gained 1/2 @ 1c, a feature being the relatively better advance in May than in deferred months.

# FREE FARES TO PADUCAH

**The Percentage**

The percentage rule by which fares are refunded—expressed in a different way—would be as follows:  
For Customers Traveling by Rail  
On purchases of \$12 or more, fare re-fund up to 16 miles round trip.  
On purchases of \$15 or more, fare re-fund up to 31 miles round trip.  
On purchases of \$18 or more, fare re-fund up to 47 miles round trip.  
On purchases of \$21 or more, fare re-fund up to 63 miles round trip.  
On purchases of \$24 or more, fare re-fund up to 79 miles round trip.  
On purchases of \$27 or more, fare re-fund up to 95 miles round trip.  
On purchases of \$30 or more, fare re-fund up to 111 miles round trip.  
On purchases of \$33 or more, fare re-fund up to 127 miles round trip.  
On purchases of \$36 or more, fare re-fund up to 143 miles round trip.  
On purchases of \$39 or more, fare re-fund up to 159 miles round trip.  
On purchases of \$42 or more, fare re-fund up to 175 miles round trip.  
On purchases of \$45 or more, fare re-fund up to 191 miles round trip.  
On purchases of \$48 or more, fare re-fund up to 207 miles round trip.  
On purchases of \$51 or more, fare re-fund up to 223 miles round trip.  
And so on for any distance.

## Injunction Ends Work of Destroying Telephone Lines by the Independent Company at Owensboro, Kentucky.

(Owensboro Messenger.)

The work of destroying the lines of the Rural Home Telephone company has been stopped, at least temporarily.

On Monday afternoon Circuit Judge T. F. Birkhead granted an injunction restraining J. D. Powers, of Louisville, H. C. Jones, of Owensboro, and L. C. Griffith, of Ohio, from interfering in any way with the physical property of the Rural Home Telephone company, or from interfering in any way with the service of the company. They are further enjoined from preventing the employes of the Rural Home Telephone company from reconstructing its exchange at Ensor.

The injunction will be heard before Judge Birkhead on February 3.

**Suit in Equity.**

The injunction was asked for in a suit in equity filed by the Rural Home Telephone company against J. D. Powers, H. C. Jones and L. C. Griffith. Col. Powers is the receiver for the Independent Long Distance Telephone company, the Kentucky and Indiana Telephone company, the Central Home Telephone company, Paducah Home Telephone company, and other Kentucky exchanges. H. C. Jones is manager of the K. and I. exchange in Owensboro. Mr. Griffith has been in Daviess county for some time in an effort to establish rural exchanges for the K. and I. company.

The petition goes into the details of the destruction of the Rural Home Telephone company's property in the eastern part of the county early Saturday morning. It alleges that the defendant, H. C. Jones, J. D. Powers, and L. C. Griffith, acting together, and pursuant to an unlawful conspiracy had among themselves, and with various other persons unknown to this plaintiff, to injure the plaintiff and its business, and to destroy the plaintiff's property in Daviess county, a half mile east of Owensboro on the Hardinburg road, and there to cut the trunk lines leading from plaintiff's exchange at Ensor into Owensboro and to tear the same from the poles upon which they were being supported and to tear the cross-arms supporting plaintiff's trunk lines from the poles to which they were attached and to completely destroy said wires and many of the cross-arms and glass insulators to which said trunk lines were attached.

**Threatened Further Destruction.**

The petition further alleges that the defendants are threatening to destroy the lines leading to the Sorgo, Stanley, Whitesville and Maceo exchanges. The plaintiff says that these defendants, acting with unknown persons, have entered into an unlawful conspiracy to wreck and destroy the property of the plaintiff and to injure its business.

The prayer of the petition follows:

**Prayer of Petition.**

"Wherefrom, the plaintiff prays the court for a temporary restraining order herein restraining defendants and their servants, agents and employees, from again severing any of the lines or wires or injuring any of the property of the plaintiff company connected with any of its exchanges in Daviess county or connected with the exchange of the Cumberland company in Owensboro or any of the exchanges of the Cumberland company in Daviess county and from interfering with the telephone service of plaintiff company in any way and from interfering with or preventing plaintiff from restoring said lines, and from interfering with, or preventing plaintiff from attaching its wires, cross-arms, cables, and cable boxes with the two poles at Ensor, Ky., herein described and that an injunction be granted against the defendant and their agents, servants and employees in accordance with said temporary restraining order, and that finally said injunction be made perpetual, and that defendants be forever enjoined and restrained from

doing any of the acts herein complained of or threatened."

The name of C. M. Finn appears as counsel for the Rural Home Telephone company.

Manager Jones, of the Home company, was served with a copy of Judge Birkhead's injunction. He said Monday night that the injunction would be obeyed.

The residents of the eastern portion of the county who were cut off from communication with Owensboro care very little about the differences between the two companies. What they are objecting to is the manner in which the work of destruction was executed.

**Col. Powers' Statement.**

The Messenger received the following statement Monday night from Col. J. D. Powers of Louisville, who is receiver for the Independent Long Distance Telephone company, the Kentucky and Indiana company and the Central Home Telephone company:

Louisville, Ky., Jan. 25.—Owensboro Messenger:—Believing that you always desire to be fair in whatever you may see fit to publish, of current events, I desire to correct some of the mis-statements published in your paper of Sunday morning, with reference to the removal of cross-arms and wires on the poles and property of the Independent Long Distance Telephone and Telegraph company, placed there by the so-called Rural Home Telephone company.

The said cross-arms and wires were placed on said poles without any authority from the owners or officers of said company. The Rural Home Telephone company, so called, had used the money, credit and appliances of the Owensboro Home Telephone company to enable it to construct and operate its alleged plants, under an agreement that its subscribers were to have communication with the patrons of the Home Telephone company in Owensboro, through the latter's exchange, free of toll charges.

Without notice to the Owensboro Home Telephone company, the Rural Home people severed their connection with the Home company's exchange and turned over its business to its rival in business, the Cumberland Telephone company. The questionable methods under which this was done are not matter for discussion now, but it is only stated as matter of history.

Many months ago, the Independent Long Distance served notice upon the Rural Home Telephone company to remove its cross-arms and wires from the poles and property of the company. This notice was responded to in writing, by the Rural Home Telephone company, who agreed to make removal. Repeatedly since then, they had been notified to remove said obstructions, and informed that if they did not so remove the cross-arms and wires placed on the poles of the Independent Long Distance Telephone and Telegraph com-

pany, without authority, the latter company would remove the same at their expense; and in the regular course of business, with linemen regularly employed by the Independent Long Distance company. Said wires were removed on last Saturday, not in the night time, as stated in your paper, but in broad daylight, and without surprise to the Rural Home Telephone company; except as they may have doubted that the Independent Long Distance Telephone company would do what they notified them they would do. The manager for the receiver of the Independent Long Distance Telephone and Telegraph company directed the removal, and he and the company were within their legal rights when they removed the obstructions placed upon said property by the Rural Home Telephone company.

And said agents and managers and the receiver of the Independent Long Distance Telephone and Telegraph company are answerable to the United States court for what was done, if done illegally and the receiver will endeavor to have the court hold those who oppose or obstruct the operations or control of

the pole lines and wires of the Independent Long Distance Telephone and Telegraph company to an accountable before said court. The cross-arms and wires of the Rural Home Telephone company were removed from the property of the Independent Long Distance Telephone and Telegraph company in an orderly and proper manner. The cutting of wires only being done at road crossings, where it was necessary to protect the public from entangled wires, and at such points, the wires were carefully rolled up and put out of harm's way. The cross-arms were dropped on the ground from where they were placed on the poles of the company, in whose interest they were removed.

Your statement that the linemen began "tearing down wires of the Rural Home Telephone company," is incorrect. They simply removed the wires and cross-arms from the property and poles of the Independent Long Distance Telephone and Telegraph company. This was carefully and scientifically done, with as little damage and waste as possible.

I think that my long residence amongst the good people of the county of Daviess will bear testimony to the fact that I was always a law abiding citizen and had great respect for the law abiding element which always predominated in the county, and I certainly would not countenance any action upon the part of any set of men that I did not believe to be legal, upright and honest and within the limits of the law. And I feel assured that nothing has been done by my consent or approval, the matter in question, that was not in every particular, justified in the estimation of good people and would meet with the approval of the courts.

I have no desire for newspaper notoriety or controversy. If any injustice has been done anywhere, the courts under whose orders I act, as receiver and custodian of telephone properties in Daviess county, are open for those who may feel themselves aggrieved and I beg to say that I shall not fail to make proper application thereto, to remedy any future obstructions placed upon the lines of the companies of which I am a receiver.

J. D. POWERS.

**THE WELLINGTON HOTEL.**

CHICAGO  
Cor. Wabash Ave. & Jackson Blvd.

Remodeled at a cost of \$150,000.  
Hot and cold running water and long distance phones in all rooms. 200 rooms, 100 with baths. Single or en suite. Rates \$1.00 and upwards.  
One of the most unique dining rooms in the country. Our famous Indian Cafe. Noted for service and cuisine.  
McCLINTOCK & BAYFIELD, Prop.

Newman Birk, secretary and treasurer of the Rural Home Telephone company, returned from Louisville Monday. He was told of the statements made by Col. J. D. Powers and gave out the following interview:

"I do not care to discuss the matter further than to say that Col. Powers is in error in his statement of the 'history' of the differences one side and the Kentucky and Indiana company on the one hand and the Independent Long Distance company on the other side.

"When these two companies passed into the hands of a 'holding corporation,' called the Central Home Company, a demand was made that the Rural company pay about \$1,000 or \$1,200 a year for the privilege of Owensboro connections, and this it refused to do. I did not care to be 'held up' in any such style. It then made a contract with the Cumberland company for Owensboro connections. 'The questionable methods,' as referred to by Col. Powers, have been approved by the Kentucky court of appeals with whom he should quarrel, not with us.

**Statement Untrue.**

"The statement that my company used the money, credits and appliances of the Owensboro Home Telephone company is altogether untrue. This company had no money and no credit except at the Owensboro Savings Bank and Trust company. It really belongs to the depositors of that bank whose money was used by it, as evidenced by the large indebtedness of Messrs. Carter, Cole and Parrish about which Mr. Pedley is now much concerned.

"If our wires were without right on the poles of the Independent company there was a lawful way in which to have this question settled. This statement that our wires were on these poles without right, we deny. But whether our wires were rightfully or wrongfully on these poles did not give Mr. Powers the right to send men here to destroy our property in the night time and without warning.

"Col. Powers uses the 'United States Court' as somewhat of a bluff. That court nor any other court will approve his 'Reefoot Lake' methods. He will be given an ample opportunity to test this in both civil and criminal courts."

In the total of the last ten years Kennedys' Laxative Cough Syrup has paid more than one-fifth of our customs revenues, or in round figures, \$550,000,000 out of a total of \$2,500,000,000.

Kennedys' Laxative Cough Syrup not only allays inflammation and irritation of throat and lungs, but it drives out the cold from the system by a free yet gentle action of the bowels. Sold by all druggists.

If you require food thought go to the public library and get a free lunch.

**NOTICE.**

I urgently request all persons indebted to me to make settlement before the first day of May, 1909, as I will after that date bring suit on every unpaid note and account due me. Now your account is to each of you a small matter, while the whole is to me very important. I shall deal with all alike; if you don't pay you may know that you will be sued, whatever your name or color may be. I hate to do this, but I am forced to it in self-defense. If you have not the money and will borrow it to pay me in full by the first day of March, 1909, I will deduct 10 per cent from your account, thereby paying the interest myself. Is this not as fair as any sane man can ask?

## Daily Thought.

Your faith is all folly if it does not lead to fair dealing.

Those Louis Quinze basket gowns certainly would look swell with the new wash tub turbans.

Taft will be made a Mason without the ordeal of initiation. Couldn't that alligator banquet be compromised on the same basis?

Glad to see flowers appearing on hats. Artificial flowers give someone an opportunity to earn an honest living, and don't hurt the birds.

Finding all that money in the country after they got as far on their trip as Washington must have made the fiscal court junketers feel optimistic.

Governor Hadley, of Missouri, saws his own fire wood; and the politicians of Missouri know how well and how persistently he can saw wood.

King Edward gave Kaiser Wilhelm a great big hug and kiss today to cement the eternal friendship of England and Germany. What if Teddy had to kiss the Mikado that way?

"Phrenology as an aid to mothers" is being seriously discussed. Most mothers have done very well training their children with a slight knowledge of anatomy.

"When a widow tells a man he is 'different' that's his cue to sit up and take notice."—Bowling Green Messenger.

That's right, Ed, break it to us gently.

The Illinois legislature voted for a United States senator today. In the words of Elihu Root, the suggestion of electing senators by popular vote, is an inference that the people are not capable of electing good men to the legislature.

If Senator Stephenson, of Wisconsin, didn't spend a quarter of a million dollars at the primary, he has a glorious opportunity to spend it on the legislature. Stephenson and Hopkins cannot understand why the legislators do not obey the will of the dear people. And how dear some of those people were, too!

Those Tennessee legislators daily are being informed that they were not elected to legislate for the people of Tennessee, but for the Democratic party, and the Democratic party just now is the gang that got Governor Patterson in office. The partisan never will be able to understand that public service is not always divisible into two classes: for the benefit of our party; for the benefit of the other party.

Paducah people believe the state normal school worth enough to offer an admirable free site to the state. Let Owensboro make a move towards securing it. The school will be a big thing for the city which gets it permanently. Now is the time to make the effort. It would be an investment in a thing which will be a success and

will stay for all time."—Owensboro Inquirer.

In one breath you decry the apparent decadence of the country, and in the next abuse the newspapers for publishing the Thaw trial. Did it ever occur to you, that if the newspapers hadn't dished up the Thaw trial with sufficient spice to hold popular interest, the country never would have become impressed with the growing social evil in time to check it? Ignorance may be bliss; but it doesn't cure a sore.

Senator Perkins thought to hinder Roosevelt by opposing the increased navy program, and to make himself square at home by supporting the anti-Jap movement. It required but a few pungent sentences for the press to show the people on the coast that Perkins was trying to stir up war with Japan, at the same time depriving the Pacific coast of adequate protection. Perkins is right unpopular at home now.

The modern long distance, wireless pioneer is a great improvement on the original, rawboned frontiersman of a day that is past. He follows Horace Greeley's advice so far as it fits his fancy. He goes west and buys up the country, but he doesn't necessarily grow up with it. He is an agricultural scientist, giving the virgin soil of the great southwest absent treatment for that unsettled feeling we live in the age of wonders.

The experience of Indian teachers and agents, who are indicted for stealing the money and lands of their charges, impresses upon us the fact that office holding in the United States is still in an unsatisfactory state, as compared with the European system. Over there graft isn't classified as theft. It has been suffered to exist so long that it is considered among the perquisites of public office. When a man succeeds to office he succeeds to the pro rata of graft apportioned to it.

## PLAIN MORALITY.

Isn't it strange that people know what is right, and know they do wrong, and yet become so blinded to the folly of their own course, that they do not recognize the inevitable evil consequences of their own wrong doing as their own handiwork? This is peculiarly true of the citizen, who sees the evil in our policies, and tries to efface it without removing the cause, which lies in his own heart.

"It has been so cold since I have been out here and there is so much snow in the mountains that I have not had the temerity to make the trip out to see the scenery, but just as soon as the mountains clear up I am going to go out on the road to see the scenery for myself.

There are many beautiful office buildings here, but there are five or six that are under contemplation now to be built within the next year that will be handsomer than any that are now here. Last year there were over \$10,000,000 in building permits and the prospects at the present time for 1909 will be greater than for 1908, so you can see that everything is moving along pretty well here in Denver.

"I noticed in the paper the other day where there would be needed 15,000 more laborers to work on the railroads and the large irrigation plants that are being put through here by eastern capitalists. As soon as these irrigation projects reach completion there will be hundreds of thousands of acres placed under cultivation that will increase in value from \$10 per acre to from \$100 to \$1,000 per acre.

"Now this may seem like a fairy tale, but if you could see the products of these small farms after the water is turned out to them you would readily understand why they would increase in value. Irish potatoes out here are as large as pumpkins; the beets that are raised are as large as balloons. There is the finest fruit raised here that I have ever seen, and it is very far superior to the California and the southern fruit on account of its firmness and rich flavor.

"What is going to make this country, however, is going to be its agriculture and it has the finest soil that I have ever seen anywhere. Alfalfa grows here as it does nowhere else, and they cut five and six cuttings a season.

"We all watch for the 'Sun' every day and if it is delayed there are three disappointed members of my family."

2:05 and 2:07 and were all renowned trotters and pacers. A very novel idea that they had here at the horse show; in the arena they used green sawdust and sitting in the seats at a distance of ten or fifteen feet it looked like a green grass award. There was absolutely no dust whatever. It was a very beautiful sight.

There isn't any getting around it, this is one of the most up to date and progressive cities I have ever seen. There is a great deal of wealth here to start with, and the mines surrounding Denver are constantly pouring their wealth into her lap. Leadville and Cripple Creek are very close by, and these two are the richest gold camps in the world.

After telling of the beauties in the city here, half of which I have not described or given, one is struck with the magnificence of the mountains which practically surround the city. From my office window I have a view of about 150 miles of the Rocky mountain range I can see Pike's Peak very plainly at a distance of so miles and to one who has been raised in the low lands like I have been, these mountains are very majestic and awe-inspiring, and I get a great deal of pleasure in constantly watching the different changes that take place at sunrise and sunset. There is a railroad that has recently been built from Denver to Steamboat Springs, a distance of 250 miles, which has passed through some of the most magnificent scenery in the world so I have been told. This road is building toward Salt Lake City, and Salt Lake City is 750 miles from Denver by the other rail routes when the Moffat road is completed the distance will be shortened about 200 miles. This road after leaving Denver enters the mountains a very short distance from here and when about 40 or 50 miles you go through over 20 tunnels in less than 40 miles, this will give you some idea of how the mountains are being bored to shorten the distance. After going through these mountains the railroad gradually rises until it reaches a height which I am told is the highest standard gauge railroad in the world.

"It has been so cold since I have been out here and there is so much snow in the mountains that I have not had the temerity to make the trip out to see the scenery, but just as soon as the mountains clear up I am going to go out on the road to see the scenery for myself.

"THE STRENGTH  
OF THE PEOPLE"Subject of First of Series of  
Three Lectures Last Night.Guy Carleton Lee Delivers Next Two  
Tonight and Tomorrow  
Night.

## SPEAKS ON SOCIAL UNREST.

On the heads of the church people of this country rests the responsibility for all the bad officials, bad laws and political evils, declared Dr. Guy Carleton Lee, the lecturer, at the Kentucky Presbyterian church last night. His subject, the first of his tripartite lecture, was "The Strength of the People," and true to his promise, he covered the truth, neither with sham, nor politeness.

He said in conclusion that what is commonly called "Christian citizenship," but which he prefers to call "right citizenship," will solve all the evils of our politics. He asserts that the same hardy moral fibre exists in the great majority of Americans today, that distinguished their forefathers; and that the social evil, so frequently exposed among the rich, is found among all classes, and his analysis of society at large in America convinces his hearers of the possibilities of the situation and their own responsibility.

First Duty of Man.

The first duty a man owes to God. That duty is to honor God. How can a man better honor God than by carrying his religion into his everyday life—living his religion? A church man must either vote for his God or vote against his God. Church men at every election go to the polls and vote against their God and know they are voting against their God when they do so.

In rapid order he summed up right citizenship, but it was the inevitable conclusion of convincing analysis and unswerving logic. Dr. Lee has a magnetic personality and a deep voice, flexible and expressive. His style of delivery and rhetoric are varied, and flashes of wit and stories run through his discourse, but always illuminating and never distracting.

Dr. Lee was introduced by Hon. E. W. Bagby.

He began with the division of citizens into two general classes, optimists and pessimists. He exalted the optimism, which carried the man over difficulties, but deplored the citizen, who can see nothing wrong with his country, state or town. He accomplishes no good, and apparently enjoys the existing evil as well as the existing good. The pessimist, Dr. Lee said, is valuable because he is continually reminding us of dangers and the evils, which we might otherwise overlook. He serves his purpose.

Conservatives and radicals

## IN SOCIAL CIRCLES

Matinee Musical Club to Have No Business Meeting.

The Matinee Musical Club will not have its business meeting Wednesday afternoon, on account of the lecture of Dr. Guy Carlton Lee at the Kentucky Avenue Presbyterian church. The lecture will last from 2:30 until 3:30 and the musical club will begin its program at 3:30 at the Woman's club. The program will feature "Nursery Rhymes in Song" and will be a charming song-cycle as follows: "Song for Tom, Dick, Bob and Peggy," (Benjamin Whelby), soloist, Mrs. William C. Gray.

"If No One Ever Marries Me," (Liza Lehmann), soloist, Miss Anne Bradshaw.

Margare Ruthven Lang's "Non-sense Rhymes;" (a) "The Old Man of Cape Horn;" (b) "The Old Parson of Skye;" (c) "The Old Man in the Kettle;" (d) "The Old Man Who Said 'Hush!'" (e) "The Old Man Who Said 'Well!'" (f) "The Young Lady Lucia;" (g) "Lady of Riga."—Mrs. James Weillie, soloist.

"Improving Songs for Anxious Children" (John and Rue Carpenter)—Miss Ruby Lamb, soloist.

Glucklich Club Dance.

The Glucklich club gave one of its series of pleasant dances last evening at the Three Links building. A number of the club members and their guests were in attendance.

Popular Tennessee Girl Who Will Visit Here.

"A congenial party of young people are enjoying an afternoon expedition to the Hermitage today, of which Will Bringhurst is host. The party includes Mr. Bringhurst's sister, Miss Mary Bringhurst, of Clarksville, Misses Ernestine Elder and Mattie Dunlap, of Clarksville, who are attending Belmont college, and Mrs. Luis E. Epperson, who is chaperones the party. Before going out to the Hermitage they were the luncheon guests of Mrs. Hugh Bradley. Miss Bringhurst, who returned to Clarksville the last of the week after a visit of some weeks here, arrived this morning and will be with Mrs. Epperson and Mrs. David Neilson until tomorrow.—Nashville Banner.

Attorney Jack Fisher, of Benton, was in the city yesterday attending court.

Mrs. J. W. Sherrill, accompanied by Miss Mabel Hough, went to St. Louis Sunday morning.

Miss Inez Parker has returned from Mayfield, where she was the guest of W. S. Mason and family.

Mr. J. B. Quimby, of the Nance & Rogers undertaking firm left this morning for Oscar.

Miss Mamie Skinner, of Priorsburg, is the guest of Miss Esther Lovelace, 1102 North Eighth street.

Mr. John Grady, of Gilbertsville, was in the city yesterday, and left this morning for Wickliffe. Mr. Grady is salesmen for the Farmers' Union.

Mr. Lee Boyd, of Boaz, has been appointed a grader for the Farmers' Union. Mr. Boyd was in the city yesterday on business.

Mr. L. W. Crawford, of Smithland, is in the city today on business.

Cheif James Collins and his grandson, Colins Clark, returned last night from a several days' visit to Louisville, Lexington and Cincinnati.

Miss Cora Smith, of McHenry, has arrived in the city to attend the Central business college.

Rev. J. T. Riley, pastor of the East Baptist church, will return home on Wednesday afternoon from a visit to his former home, Folsondale, Ky.

Mr. C. F. Couts, 725 Broadway, has gone to Chicago on business.

Mrs. F. M. Berger and grandson, Master Lee Jones, of 1512 South Fifth street, have gone to Golconda to visit.

Mr. I. L. Davis went to Dawson Springs this morning for his health.

Mrs. W. M. Beadles, of 1125 Madison street, is visiting friends and relatives at Wingo.

Music of Telegraph.

Every one has put his ear to a telegraph pole to hear the wires hum, and most people have assumed that the wind was entirely responsible for the sound. So it is in many cases, but often the note is heard where not the slightest movement of the air is perceptible. A recent French investigator tells us that the sound in this case is due to the expansion and contraction of the wires from variations of temperature. As the wires are not perfectly uniform, they rub against the insulators, making a slight noise, which is amplified by the post acting as a sounding board.

Another investigator is sure that the sounds are due to electric waves, but he fails to explain how ordinary telegraph wires should be able to serve as wave detector, and in what way the electric waves are transformed into sound waves. The other theory seems more probable.

Some curious stories are told in this telegraph wire music. In Siberia the bears think that it is the buzzing of bees, and would tear down the poles to look for honey if the constructors did not pile great stones about them to prevent this.

In Columbus, O., to Washington. He was later sent by Lincoln as minister to Ecuador, where he died of yellow fever. This is because the south wind in this region brings rain, and the forest shuns off the north wind. In India some districts the noise is popularly supposed to be due to the passage of messages, but it is hardly necessary, to say that there is no evidence to support this view.

Mr. Sam Cohen, of 1521 South Sixth street, received a telegram today announcing the death of his friend, Mr. W. H. Jackson, of Union City, Tenn.

### FLYING SQUADRON

DOCTORS AND POLICEMEN VACCINATE NEGROES.

Couples at Dance Called Out and Scratched—Saloons Visited.

A flying squadron of police, accompanied by a corps of vaccinators, has been visiting the haunts of negroes at night, and every negro that failed to show a good fear on his arm was vaccinated. This plan was evolved by Dr. H. P. Sights, city health officer, to prevent an epidemic of smallpox by vaccinating nearly all of the negroes in the city. Last night he was accompanied by Dr. J. W. Bass, Dr. P. H. Stewart, Deputy Sheriff Gus Rogers and Patrolmen Morris, Stewart, Clark and Gilmour and over a hundred arms were scratched by the little points.

After meeting last night the squadron went to the saloons on lower Kentucky avenue. Every exit was guarded and then the doctors entered. Negroes paused and set down half glasses of beer while sleeves were rolled up, and if no scar was exhibited the medics got busy. Several became angry, but the presence of the big policemen served as a quietizer. After all of the saloons and pool rooms had been visited and many negroes vaccinated, the flying squadron went to Seventh and Adams streets. A big hold was in progress at the hall, but the doctors never paused.

Not count was kept of the number of arms scraped, but the medics believe the number was over a hundred, and probably there will be as many sore arms by the last of this week.

Kodol is a combination of all the natural digestive juices found in an ordinary healthy stomach, and it will digest your food in a natural way. Pleasant to take. Sold by all druggists.

Not Very Strong.

### The Fresh FRUITS

It's mighty hard to keep you posted right up to the minute about new arrivals of fruits at our store, for there are fresh shipments each day. Today, big, sound bananas, sweet, juicy pears, big red apples, Messina oranges and lots of others. Come and see them; that's the best way.

INSTANT RELIEF FROM ITCH.  
The Itch Gone, the Skin Soothed and  
Refreshed—Immediately.

Instant relief from that itch.  
A few drops of a soothing liquid—  
And the itch is gone as if by  
magic.

Just a drop or two on the skin and  
no more of that torturing, endless,  
nerve racking itch.

Can you imagine how it will feel—  
that itching agony swept away in a  
moment?

You can know the relief if you  
just try the simple remedy—simplest  
of external liquid remedies—oil of  
wintergreen as compounded in D. D.  
Prescription.

We positively know that it alleviates  
the itch immediately—we vouch for  
this and guarantee it—for we  
have seen it used in too many cases,  
and the cures that follow, as far as  
we know, seem to be permanent.

R. W. Walker Co.

Five million dollars will be spent to  
develop a water power 165 miles  
from Butte, Mont. The electric  
power will be used in the mines  
near Butte.

## LARK'S KIDNEY GLOBES

Guaranteed Cure for all Kidney and Bladder Diseases.

SMALL AS A PILL EASIER TO TAKE

Two doses give relief, and one box  
will cure any ordinary case of Kidney  
or bladder trouble. Removes Gravel, cures Diabetes, Seminal  
Emissions, Weak and Lame Back, Rheumatism, and all irregularities of  
the Kidneys and Bladder in both  
men and women. Sold at 50 cents  
per box on the no cure no pay basis  
by McPherson's Drug store, Fourth  
and Broadway, sole agent for Paducah,  
or sent by mail upon receipt of  
price by Lark Medicine Co., Louisville, Ky.

## Home Course In Modern Agriculture

### VIII.—Corn Growing

By C. V. GREGORY,  
Agricultural Division, Iowa State College

Copyright, 1900, by American Press Association

SINCE corn is the principal crop grown over so large a section of the United States it is important that we learn as much as possible regarding the best methods of producing it. The average yield of corn in the United States in 1900 was only 23.7 bushels per acre. Many of the best farmers are able to obtain an average yield of sixty to seventy bushels per acre year after year. There is no secret in their methods. They are simple enough to be applied to every farm in the corn belt. There is no reason why the average yield per acre should not be fifty bushels or more instead of less than half that, as at present.

In preparing to raise a maximum crop of corn there are two main factors to be considered—the soil and the seed. Of these two the first is prob-

ably the more important. We have already learned how the plant obtains food and water from the soil. The first step in preparing the soil for a corn crop, then, is to see that there is a plentiful supply of plant food on hand. This we can do by using barnyard manure liberally and by following a consistent system of rotation that will equalize the demands made on the soil and keep up the supply of nitrogen and humus.

The next point is to see that the soil is in such condition that the roots will have little difficulty in branching out to secure the needed plant food and water. Thorough plowing, disk-ing and harrowing will make the soil fine and mellow, so that the roots will have little trouble in obtaining all the plant food they can use, provided it is there at all.

The water supply can be regulated to a considerable extent by tile drainage and by keeping the surface loose to check evaporation. The temperature of the soil is also an important factor in hastening germination and early growth. Drainage, cultivation and the maintenance of a plentiful supply of humus will aid greatly in securing a warm seed bed by planting time.

With a warm, well prepared soil containing sufficient quantities of plant food and water the next question that comes up is regarding the kind of seed to put into that soil. Almost any kind of seed will grow and produce a fair crop under favorable conditions. What we are after, however, is not a fair crop, but an extra good one.

The seed of different strains of corn varies greatly in its ability to produce yields. In the spring of 1905 the Iowa experiment station gathered seed from nearly a hundred different sources and planted it on the station grounds. Under conditions that were as nearly alike as it was possible to make them the yields from the different strains varied from thirty-one to eighty bushels per acre. This variation shows that a large share of the improvement in corn production must come through the breeding of high yielding strains. It is not safe to ship in seed corn from a distance. Corn is very sensitive to changes in climate and soil. To obtain the best results the work of breeding must be done for each locality and to some extent for each farm.

A method of improving seed corn that will surely result in some improvement and one that has simplicity to recommend it is that of selecting a number of the best ears each year and planting them in a field by themselves or in one corner of the main field. By selecting the best ears from this breeding plot each year to plant next year's breeding plot and using the rest of the good ears to plant in the main field some improvement can be effected. The weak point in this plan, however, is that the yielding power of an ear cannot be told from its appearance. Neither is it possible to prevent inbreeding by such a method.

To avoid these difficulties the "individual ear" plot has been devised. This should preferably be at least forty rods from the nearest cornfield. Where this is impossible a strip along the south side of a field of the same variety may be used. As the prevailing July and August winds are from the south, very little pollen from the main field will blow over on the breeding plot.

Each row in the individual ear plot is to be planted with the kernels from a single ear. As any fair sized ear will plant a row forty rods long, this is a convenient length for the plot. Select from 50 to 100 of the best ears you can find among your seed corn and plant them in as many rows across the plot. The work can be done with a planter if care is taken to clean the seed boxes out thoroughly each time across. The cultivation given to the plot should be the same

as that which the main field receives. The time for special treatment comes when the tassels begin to appear. We have already learned that inbreeding is weakening and that cross fertilization develops strength and vitality. In order to prevent inbreeding in the individual ear plot the tassels on every alternate row should be pulled out as soon as they appear. In order that these may be removed before they shed any pollen it will be necessary to go over the field every other day for a week after the first tassels start. At the same time any tassels from weak, barren or spindling stalks in the other rows should be removed. In this way only pollen from healthy, vigorous stalks is allowed to mature. Thus the ears on the detassled rows, being cross fertilized and having only strong, healthy male parents, have a much better chance of producing large yields when planted than would ears picked from the general field.

Present at the meeting were Mrs. Roy McKinney, Mrs. Cook Husband and Mrs. Edmund Post, members of the Humane society. Mrs. McKinney made a short talk to the commissioners in which she said the society had been organized in 1906, but owing to the financial stringency the dues had not been collected, and therefore no regular officers could be employed. She suggested that the police department fill the place, and the commissioners decided that was proper.

The problem of raising the salaries of the firemen from \$65 to \$75 a month was deferred till Dr. Frank Boyd and Col. R. R. Sutherland can investigate it. The commissioners were in favor of the increase, but the board did not feel inclined to vote out more money than had been allowed for salaries.

The city made an appropriation for the purchase of 4,000 feet of hose, and Chief James Wood last night asked the board that part of the hose be purchased at once. The new hose is needed by the department, while it will take the factory several months to prepare and ship the order. Also Mayor Smith was requested to purchase a pair of colars for the team to the truck at the No. 4 station.

Present at the meeting last night were: Dr. Frank Boyd, Mann Clark, R. R. Sutherland, John Bonds and Mayor Pro Tem Ed D. Haman.

Some tropical daisies measure a foot in circumference.

NO GREASE OR DANGEROUS DRUGS

In "Hericide," the New Scientific and Successful Dandruff Treatment.

Have you dandruff? Then you have a contagious parasitic disease, unpleasant, unhealthy and one that will eventually lead to baldness. To cure it you must destroy the parasite that eats at the root of the hair. The only preparation for destroying these germs is Newbro's Hericide. Charles Klein, of Laramie, Wyo., says: "Hericide alayed the itching, cured the dandruff and stopped my hair's falling out; and it is bringing a new crop of hair." Hericide is free from grease or dangerous drugs, and makes hair glossy and soft as silk. One bottle will convince you of its merits. Sold by leading druggists. Two sizes 50¢ and \$1.00. Send 10¢ in stamps for sample to The Hericide Co., Detroit, Mich. R. W. Walker & Co., Special Agents.

Shortly before planting time the ears should be shelled and run through a seed corn grader to take out the bad and tip kernels and divide the rest into even grades. The next step is to block up the planter and run through a sample of each grade, changing plates until a set is found that will drop the required number of kernels practically every time. If this is done and well tested seed used a good stand will almost certainly result.

Avoid too deep planting. All that is necessary is to have the seed well covered with moist soil. If this can be done without putting it down more

than an inch or two, so much the better. Since the plant cannot begin to digest and use the plant food of the soil and air until it has unfolded its leaves it is plain that the less soil it has to push through before it can spread out its leaves and get to work the sooner it will commence to grow. Deep planted seeds often so nearly exhaust the plant food in the endosperm before they reach the surface that they are never able to develop into strong healthy plants.

After planting the aim should be to keep the soil in the same fine tilth it was in at planting time in order to provide large feeding ground for the roots and prevent the escape of capillary moisture.

Kodol for Dyspepsia and Indigestion does the ordinary work of the stomach, so that by taking a little Kodol every now and then you cannot possibly have indigestion or any form of stomach trouble. Sold by all druggists.

## POLICEMEN WILL ENFORCE ALL LAWS

Humane Society Enlists the Department.

Salaries of Firemen Will Be Increased If It Is Possible This Year.

CHIEF WOOD WANTS HIS HOSE.

All policemen will be required to take an active part in the work of the Humane society in the future, according to the vote of the members of the fire and police commissioners, while in regular session last night. The board issued instructions to Chief of Police Collins to enforce the city ordinance against the use of old and decrepit horses. The action of the commissioners was unanimous.

Present at the meeting were Mrs. Roy McKinney, Mrs. Cook Husband and Mrs. Edmund Post, members of the Humane society. The society had been organized in 1906, but owing to the financial stringency the dues had not been collected, and therefore no regular officers could be employed. She suggested that the police department fill the place, and the commissioners decided that was proper.

The city made an appropriation for the purchase of 4,000 feet of hose, and Chief James Wood last night asked the board that part of the hose be purchased at once. The new hose is needed by the department, while it will take the factory several months to prepare and ship the order. Also Mayor Smith was requested to purchase a pair of colars for the team to the truck at the No. 4 station.

## TOBACCO NEWS

## Hopkinsville Tobacco.

Hopkinsville, Ky., Feb. 9.—A big sale for the week is reported by the Planters' Protective association, all of the tobacco sold being of the 1907 crop. The sales aggregated 293 hogsheads at the recently reduced prices adopted by that organization. With the exception of Monday, when the thermometer registered zero, daily sales were held on the loose floor. About 250,000 pounds were sold during the week at prices ranging from \$3.50 to \$6.50 for lugs and \$6.50 to \$10.50 for leaf. These prices were very satisfactory, as is shown by the very few rejections. The report of sales by the Planters' Protective association on the ten markets of the dark tobacco district for the past week, is as follows: Springfield, Tenn., 17; Cadiz, Ky., 36; Guthrie, Ky., 176; Hopkinsville, Ky., 418; Paducah, Ky., 209; Murray, Ky., 202; Clarksville, Tenn., 539; Rns.

## Removes Poisons of Catarrh and Rheumatism from the Blood.

For catarrh of the head use a teaspoonful of salt and a quarter teaspoonful of borax dissolved in a pint of warm water. Snuff this mixture through the nostrils twice daily and immediate relief is experienced. To cure, a constitutional blood remedy must be used. Catarrh and rheumatism are both due to accumulated poisons in the system. These poisons must be eliminated.

The following simple home mixture effectually acts on the kidneys, the bowels and the skin, causing them to resume their functions quickly and properly:

Get one-half ounce fluid extract Buchu, one ounce compound fluid Balmwort, and two ounces syrup Sarsaparilla compound. Mix and take a teaspoonful after each meal and one at retiring. Many cases of catarrh, rheumatism and kidney trouble have already benefited by this treatment.

Clarksville, Ky., 189; Princeton, Ky., 112; total sales, 1,897.

## Clarksville Tobacco.

Clarksville, Tenn., Feb. 9.—The receipts of tobacco in January here were 169 hogsheads; sales, 1,911 hogsheads; shipments, 1,140 hogsheads; total stocks February 1, 1,346 hogsheads; buyers' stocks, 265 hogsheads; sellers' stock, 1,081 hogsheads. The receipts last week were 90 hogsheads; sales, 119 hogsheads; market not materially changed. Receipts of loose tobacco have been smaller. The market was strong.

The salesmen of the Planters' association sold 178 hogsheads last week at late ruling prices.

## Old tobacco is quoted: Low lugs, \$5.50 @ 6.00; common lugs, \$6.00 @ 6.50; medium lugs, \$6.50 @ 7.00; good lugs, \$7.00 @ 7.50; low leaf, \$7.00 @ 8.00; medium leaf, \$9.50 @ 10.00; good leaf, \$11.00 @ 12.00; fine leaf, \$12.50 @ 13.50; choice selections, none offering; common leaf, \$8.50 @ 9.00.

## Association Sales.

Hopkinsville, Ky., Feb. 9.—The latest report of Auditor Seales, of the Planters' Protective association, shows that the effect of reducing the prices on the 1907 crop of tobacco pledged to the organization has been to secure many purchasers, and only about 10,000 hogsheads of the old crop remain unsold in the big pool.

On the Hopkinsville market the salesmen reports that all of the 1907 crop is sold, the last of the hogsheads being taken during the past week. The auditor's report for the entire "Black Patch" follows:

	Sales Week.	Sales Year.
Springfield, Tenn.	17	8,271
Cadiz, Ky.	35	1,358
Guthrie, Ky.	176	5,209
Clarksville, Tenn.	418	5,110
Paducah, Ky.	209	7,913
Murray, Ky.	202	3,339
Mayfield, Ky.	3,976	3,976
Russellville, Ky.	189	11,596
Princeton, Ky.	122	1,374
Totals . . . . .	1,897	49,964

## HIS PLEA.

"A fit husband for my daughter! Why, in the first place, she is half a head taller than you."

"Well, sir, I don't expect to be so short after I am married."

## LIVESTOCK.

Louisville, Ky., Feb. 9.—Cattle—The receipts of cattle were 1,295 head—somewhat lighter than had been anticipated, as there was a very good attendance of buyers on the yards. The demand for desirable butcher cattle was active and prices were a shade better than the close of last week, or pretty close up to last Monday, yet there was not as much of a wire edge to the trade. Medium and common butcher cattle were just about steady with the windup of the week. The feeder and stocker trade ruled about steady. Fairly good demand for the best grades. Medium, plain and common grades slow. Bull market steady. Canners and cutters unchanged. Choice milch cows ready sale. Common dull. Not many heavy cattle on sale. That class about steady. The pens were well cleared this evening. We quote: Shipping steers \$4.50 @ 5.75; beef steers \$3 @ 5.25; fat heifers and cows \$3 @ 4.65; cutters \$2 @ 3.90; canners \$1 @ 2; bulls, \$2 @ 3.75; feeders \$3 @ 4.75; stockers \$2 @ 4.25; choice milch cows \$35 @ 45; common to fair \$15 @ 30.

Calves—Receipts 167. The market ruled firm. Bulk of the best 7 @ 7 1/4 c. Some extra good higher. Medium 4 @ 6c; common 2 1/4 @ 4c.

Hogs—Receipts 4,398. There was good local and shipping demand and prices were 10c higher on choice corn fed hogs. Selected 100 pounds and up, \$6.70; 130 to 160 pounds, \$6.20; pigs ranged from \$4.85 for light pigs to \$5.25 for heavy pigs; roughs \$6.10 down.

Hogs from doubtful sections selling only under guarantee, 10 per pound off on all that kill soft or oily.

Sheep and Lambs—Receipts 335. The market ruled fully steady. Choice lambs selling around 6c. Some extra nice fat lamb heads. Culls 3 @ 5c; fat sheep 4c down. Common, trashy sheep and lambs hard to sell.

St. Louis, Feb. 9.—Cattle—Receipts 3,500, including 500 Texans;

steady; beef steers \$3.50 @ 7.10; stockers and feeders \$3.50 @ 5; cows and heifers, \$3.25 @ 6.25; Texas steers, \$3 @ 6.10; cows and heifers, \$1.75 @ 4.25; calves in carloads \$4.25 @ 8. Hogs—Receipts 13,000; market 5c to 10c lower; pigs and lights \$4.90 @ 6.20; packers \$6 @ 6.40. Sheep—Receipts 3,500; market 10c to 15c lower; natives \$3.75 @ 5.50; lambs \$4.50 @ 7.65.

## And the Clock Struck 1.

The sugar consumption of the United States is increasing at the rate of 50 per cent. every ten years.

The prima nobilis, a shellfish found in the Mediterranean, spins fine silk.

## RICH RED BLOOD.

You Will Never Have It as Long as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets; a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and ear sickness and vomiting of pregnancy almost immediately. Gilbert's drug store sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

HYOMEI  
(Pronounced HIGH-O-ME)

CURES CATARRH, ASTHMA, Bronchitis, Croup, Coughs and Colds, or money back. Sold and guaranteed by

GILBERT'S DRUG STORE.

MAY DINE WITH  
THE PRESIDENT

Gov. Wilson to Join Roosevelt  
On Train.

Due to Arrive at Frankfort Thursday Evening—Negro Committee is Appointed.

## GENERAL OBSERVANCE OF DAY

Frankfort, Ky., Feb. 9.—Governor Wilson and Theodore Roosevelt, president of the United States, expect to meet in Frankfort next Thursday evening on board the president's private car, which, according to advices from Washington, will be attached to the O. & O. train from the east, due to arrive here at 6:14 o'clock.

The governor said that he had not invited the president to take dinner with him on Thursday, as he would not be in Frankfort that day, but he expected to meet the president on the train that afternoon. There seems to be some doubt as to the route the president will take from Washington to Louisville, but a telegram from Washington has stated that he would leave Washington on the C. & O. train, which would put him in Frankfort at 6:14 o'clock Thursday evening.

A Lexington newspaper printed a telegram from Secretary Loeb stating that the president would not be in Lexington, but it is believed here that this was done to prevent any delegation waiting on the president at the train, and it is probable that the president will not announce his route, as he is in a hurry this time and has no time for speechmaking, as would be the order of the day if the towns through which his train will pass are known in advance.

Appoints Negro Committee.

Governor Wilson appointed a committee of representative negroes of the state to act with the other committee in charge of the Lincoln memorial program. In making the appointment Governor Wilson gave out the following:

"The governor appoints a committee of the negro people for the Lincoln centenary at the Lincoln farm, February 12, 1909.

"There is very great appropriateness in the suggestion of the appointment of a committee of representative negroes for the Lincoln centenary. Abraham Lincoln is revered by the negro people as the great emancipator, and one cannot think of anything more fitting than that they should be a part of the impressive scene of the laying of the cornerstone of the Lincoln Memorial hall, nor was this a matter not thought of by the governor in appointing the original Lincoln centenary committee for Kentucky at the dedication, and therefore it has become not only proper, but a thing which it would be a reproach to fall in, that the negro people should have honored representatives present to bear witness to their love for Abraham Lincoln and their faithfulness to his memory and to be a part of that great scene just as they should be a part of the great life of our country."

The Lincoln Farm association, in the original letter asking the governor to appoint the committee, followed the course pursued in all the other states of appointing a committee formally, not as a part of the organization, nor to take part in the ceremonies, but simply to give the authority of the state name to the letters written to ask contributions to

**Wallerstein  
Says:**

IF you intend to take advantage of this chance to wear the best clothes made—Roxboro and Hart, Schaffner & Marx fine suits and overcoats—it's time for you to get action pretty soon.

You can buy low-priced clothes almost anywhere these days, but you don't see such qualities as these at such prices anywhere else.

**MEN'S and Young Men's Suits and Overcoats** that sold up to \$40, now reduced to **\$17.75**; suits and overcoats that sold up to \$25, now **\$13.50**; suits and overcoats that sold up to \$18, now **\$8.75**; suits and overcoats that sold up to \$12.50, now **\$5.50**. All sizes are shown in each assortment. Some of them are silk lined. All of them are dependable and are worth more than double the price we ask.

"I t's NOT HOW LITTLE YOU PAY, but HOW MUCH YOU GET, that counts in a bargain sale."

the undertaking, and this did not require the appointment of representatives of the negro people.

## Negroes to Be Represented.

"But when it was seen that the day

would bring many visitors to Ken-

tucky and that Kentucky would be

held responsible if there was no pro-

vision for the shelter or transporta-

tion of the visitors, the Kentucky

committee saw that it would not do

to act simply as endorsers of the let-

ter asking contributions, but that

they must take, at least, enough part

in the occasion to guard against hard-

ships to the people who visited Ken-

tucky for this purpose, and this was

at once appreciated by the managers

of the association, and both commit-

tees have been acting together ever

since, and now the Kentucky com-

mittee is to have an important part

in the ceremonies to represent Ken-

tucky at the dedication, and therefore

it has become not only proper, but a

thing which it would be a reproach

to fall in, that the negro people

should have honored representa-

tives present to bear witness to their

love for Abraham Lincoln and their

faithfulness to his memory and to be

a part of that great scene just as they

should be a part of the great life of our

country."

In Memory of Lincoln.

"In memory of Abraham Lincoln, and to bring before us all the ideal

of the pleased humanity which freed

a race and which is such a noble part

of the life of Abraham Lincoln, I do

appoint as members of the negro peo-

ple's centenary committee the fol-

lowing representative men of their

race:

"George W. Gentry, Stanford;

the Rev. P. H. Kennedy, Henderson;

the Rev. C. H. Parrish, Louisville;

Dr. E. E. Underwood, Frankfort;

Jordan Jackson, Lexington; J. D. McGowan,

Mt. Sterling; Albert S. White, Louis-

ville; E. W. Marshall, Louisville; H.

H. Smith, Hopkinsville; Dave Miller,
